Qualification through active referral partnership

01

SYSTEM ARCHITECTURE

The complete growth framework from research to active referral partnership

The SCOPES Growth System Framework

The SCOPES Growth System is a **closed-loop framework** for healthcare referral ecosystems. The goal is building **trusted, long-term referral partnerships**.

Every phase feeds into the next: research informs marketing, marketing feeds sales, and sales converts into active partnerships. Each transition is driven by **observable behaviors and measurable criteria**.

Research-First
No outreach without IPP matching

Behavior-Driven
Every stage has clear signals

Partnership-Focused
Not just leads — relationships

Progressively Automated
Manual now, CRM-ready later

Prospect Database — Objective & Record Structure

OBJECTIVE

Identify organizations and decision-makers that match SCOPES' **Ideal Partner Profile (IPP)** before any marketing or sales interaction. Every prospect enters the database with a **"Prospect"** status.

REQUIRED FIELDS PER PROSPECT

Organization
Company or practice name

Contact(s)
Decision-makers & influencers

Industry
Legal, medical, employer, etc.

Specialty
Practice area or focus

Geography
City, state, region

Source
Where the prospect was found

Priority
High / Medium / Low

Status
Prospect / Active / Partner

Key Principle: Every identified organization enters the Prospect Database with a **"Prospect"** status. No marketing or sales outreach begins without research-backed identification and IPP matching.

Seven Research Channels for Prospect Identification

1 Google Keyword Research

SEO & PPC search demand analysis. Classify by intent, competition, audience, and funnel stage.

2 LinkedIn Sales Navigator

Research law firms, attorneys, medical directors, clinic owners, case managers.

3 Google Maps Research

Identify law firms, clinics, hospitals, chiropractic centers by location and reviews.

4 Professional Directories

State Bar directories, medical associations, workers' comp organizations, rehab associations.

5 Social Media Research

LinkedIn, Facebook, YouTube, Instagram, X — activity, followers, engagement, decision-makers.

6 Existing Network

Current referral partners, past referrals, internal contacts, community partners, employee referrals.

7 Events & Conferences

Capture events, attendees, speakers, exhibitors, and contacts for follow-up.

Integration Principle: Each channel captures different prospect intelligence dimensions. Combined, they create a **360-degree view** of every potential partner before outreach begins.

Keyword Research — Search Demand Classification

CLASSIFICATION FRAMEWORK

Keyword	Monthly Traffic	Competition	Search Intent	Target Audience	Funnel Stage	Priority
Personal injury rehabilitation	High	Medium	**Commercial**	Attorney	Consideration	**High**
Physical therapy after car accident	Medium	Low	Informational	Patient / Attorney	Awareness	Medium
Refer injured patient	Low	Low	**Transactional**	Physician	Decision	**High**
Workers comp rehab clinic	Medium	Medium	**Commercial**	Employer	Consideration	High
Neurological rehabilitation center	Medium	High	**Commercial**	Case Manager	Consideration	Medium

SEARCH INTENT TYPES

Informational
Seeking knowledge or answers

Commercial
Comparing services or providers

Transactional
Ready to take action or refer

Navigational
Looking for a specific brand

Each keyword is mapped to a **landing page**, assigned a **campaign type** (SEO / PPC / Both), and prioritized based on referral potential and search volume.

LinkedIn Sales Navigator & Google Maps Research

LINKEDIN SALES NAVIGATOR

TARGET PROFILES

- Law firms & individual attorneys
- Practice managers & medical directors
- Clinic owners & HR managers
- Case managers & referral coordinators

DATA CAPTURED

- Company name, contact, position, industry
- Employee count, LinkedIn URL, location
- Mutual connections, relationship status
- Engagement history and content interactions

GOOGLE MAPS RESEARCH

TARGET LOCATIONS

- Law firms & legal practices
- Medical clinics & hospitals
- Chiropractic centers
- Occupational health providers

DATA CAPTURED

- Website, phone, email
- Reviews, rating, specialty
- Distance from SCOPES location
- Notes on referral potential

Strategic Insight: LinkedIn captures **decision-maker intelligence** — who makes referral decisions. Google Maps captures **location intelligence** — where potential partners are. Combined, they create a complete geographic and organizational prospect map.

02

MARKETING FUNNEL

Converting prospects into marketing-qualified leads through measurable engagement

Stage 1 — Prospect to Visitor: Traffic Source Framework

Objective: Generate the first measurable interaction with any SCOPES-owned marketing asset.

SEO

- Website session started
- Organic search click
- ≥60 seconds on page
- Scroll depth >50%
- Two+ page views
- Returning visitor

Google PPC

- Ad click
- Landing page visit
- Time on page
- Conversion page viewed

LinkedIn Organic

- Profile visit
- Company page visit
- Content click
- Document download

LinkedIn Outreach

- Connection accepted
- Message opened
- Message replied
- Website clicked

LinkedIn Ads

- Ad click
- Lead form opened
- Website visit

Email Marketing

- Email opened
- Link clicked
- Multiple opens
- Reply received

Social Media

- Video viewed ≥90%
- Saved post
- Shared post
- Website click

Webinars

- Registration
- Attendance
- Watched ≥75%
- Asked a question

Stage 2 — Visitor to Identified Lead: Conversion Actions

Objective: Convert an anonymous visitor into a known contact. Minimum: Name, Email, Phone, LinkedIn, Organization.

ATTORNEY RESOURCES

- Attorney Referral Guide (PDF)
- Medical-Legal Collaboration Guide
- Referral Process Checklist
- Workers' Compensation Guide
- Continuing Education Registration

HEALTHCARE RESOURCES

- Clinical Outcome Reports
- Treatment Pathways
- Referral Toolkit
- Patient Care Guide
- Clinical Webinar Registration

GENERAL CONVERSION

- Contact Form
- Referral Form
- Newsletter Subscription
- Consultation Request
- Event Registration

CRM Record Created: At this stage, the CRM creates a **Lead record** with source attribution, campaign tracking, first touchpoint, and latest touch — enabling full journey visibility from first interaction.

Stage 3 — Lead to MQL: Four-Dimension Qualification

Objective: Identify leads that are a strong fit and show meaningful engagement. Both fit AND engagement required.

1 Fit

- Matches Ideal Partner Profile
- Relevant specialty
- Target geography
- Referral potential
- Decision-making authority

2 Engagement

- Multiple website visits
- Multiple email opens
- Webinar attendance
- Resource downloads
- LinkedIn engagement

3 Intent

- Visited referral pages
- Requested consultation
- Viewed partnership content
- Returned multiple times
- Submitted referral forms

4 Recency

- Activity within last 30 days
- Frequent interactions
- Recent return visits

LEAD SCORING MODEL

Criterion	Points	Type
Attorney	**+30**	Fit
California	**+15**	Fit
Decision-maker	**+20**	Fit
Downloaded Attorney Guide	**+15**	Engagement
Attended Webinar	**+20**	Engagement
Visited Referral Page	**+25**	Intent
Replied to Email	**+15**	Engagement

MQL THRESHOLD

≥100 Points

Only when **both fit and engagement** are sufficient should the lead become an MQL and transfer to Business Development.

03

SALES FUNNEL & PARTNERSHIP

From qualification to active referral partner — a relationship-driven sales process

SAL to SQL — Business Development Review & Outreach

STAGE 1 — MQL → SAL (SALES ACCEPTED LEAD)

Business Development reviews the lead against checklist:

- Correct organization verified
- Decision-maker identified
- High fit with Ideal Partner Profile
- Strong engagement history
- Valid contact information confirmed

If approved: Ownership transfers from Marketing to Business Development.

STAGE 2 — SAL → SQL (SALES QUALIFIED LEAD)

Initial outreach confirms five key criteria:

Need — Do they have referral needs?

Interest — Are they open to partnership?

Authority — Can they make referral decisions?

Timing — Is now the right time?

Partnership potential — Mutual value fit?

Channels: Personalized email, LinkedIn message, phone call.

STAGE 3 — INITIAL CONTACT KPIs

Contact Rate

% of SQLs reached

Response Rate

% who reply to outreach

Time to Response

Average hours/days

Discovery Meeting to Partnership Agreement

STAGE 4 — DISCOVERY MEETING

OBJECTIVES

- Understand the organization's referral process
- Identify pain points in current referral workflow
- Explore mutual value and compatibility
- Assess long-term partnership potential

KPIs

Meetings booked → Meetings completed → Discovery-to-proposal conversion rate

STAGE 5 — PARTNERSHIP DISCUSSION

KEY TOPICS

- Referral workflow and handoff process
- Communication protocols and expectations
- Service expectations and quality standards
- Value proposition alignment and next steps

STAGE 6 — PARTNERSHIP AGREEMENT

DELIVERABLES

- Agreement confirmed and signed
- Workflow established and documented
- Key contacts documented on both sides

PROGRESSION FLOW

Onboarding to Active Referral Partner

STAGE 7 — ONBOARDING

ACTIVITIES

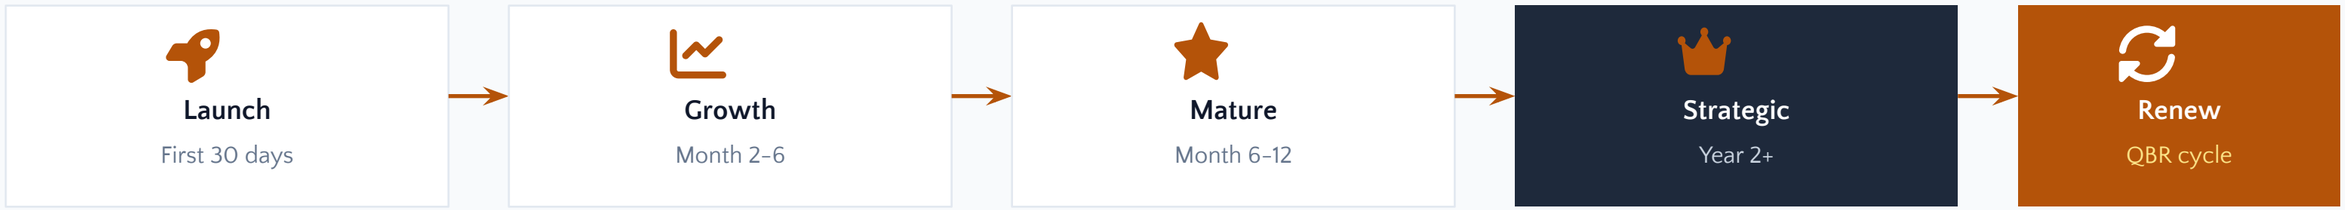

- Welcome package delivered
- Referral guide and process documentation
- Contact directory shared (both organizations)
- Workflow training completed
- Communication channels established
- First touchpoint scheduled

STAGE 8 — ACTIVE PARTNER

SUCCESS METRICS

- First referral received
- Referrals per month (trending up)
- Referral quality score
- Partner engagement level
- Quarterly business reviews completed
- Partner retention rate

PARTNER LIFECYCLE MANAGEMENT

Why This Framework Fits SCOPES

Unlike a typical B2B SaaS funnel, SCOPES operates in a **relationship-driven healthcare referral ecosystem**. The goal is not simply to generate leads but to build trusted, long-term referral partnerships.

↔ Dual-Channel Support

Supports both **inbound marketing** (SEO, PPC, content, webinars, email) and **outbound business development** (research, LinkedIn, direct outreach).

Behavior-Driven Transitions

Every transition between stages is driven by **observable behaviors** and **measurable qualification criteria** — no guesswork.

Relationship-First Design

Built for **trust and long-term value**, not transactional lead conversion. Each partner is nurtured through a structured lifecycle.

Progressive Automation

Structured for **manual implementation today** with progressive CRM automation via APIs, lead scoring, and workflow automation.

This system transforms partnership development from **ad hoc networking** into a **repeatable, scalable, and measurable** growth engine — designed specifically for the healthcare referral ecosystem.

IMPLEMENTATION READY

Manually implementable today. Progressively automate with CRM, APIs, lead scoring, and workflow automation.

RESEARCH → ENGAGE → QUALIFY → PARTNER
